---

### Abstract & Skills

Frontend developer deeply interested in CSS Architecture and Javascript applications.

I have experience with Grunt/Gulp/Webpack based workflows; Object Oriented CSS and naming conventions like BEM methodology.

I understand CSS preprocessors like Sass/LESS and use them based on the project needs.

I have experience working in mid sized projects and capable of taking them to bigger instances.

I'm fully interested in new frontend technologies and use them if a new project requires it.

I believe Web technology can change the world.

---

### Experience

#### ADHOC TI / Frontend Engineer

MAR. 2017 - CURRENT, MEXICO

Software engineer oriented to development with Frontend technologies.

I am in charge of conceiving and developing projects - sites, web applications and mobile applications - from a client's perspective. I have a strongly oriented profile to web technologies.

I have worked on performance projects on medium-scale websites and have also had the opportunity to develop iOS / Android apps with React Native that are already in production.

#### ANCLA STUDIO / Web Developer Sr.

NOV. 201 - MAR. 2017, MEXICO

Frontend development. With experience in Mobile-friendly and responsive web development.

I have worked on projects with a scope of mostly national viewing. With the ability to analyze web projects before conception, develop sitemaps, Information Architecture and make suggestions oriented to project needs.

**INGLÉS SIN BARRERAS / Webmaster**

FEB. 2011 - NOV. 2011, MEXICO

In charge of the sites managed by the company, creation and optimization of web pages, development of internal applications.
